Subject: Your letter with reference no. 07-01/3954 of 17.12.2025, concerning the scope adjustment of project 22-EU-TG-RBGP Part VIIIIG

Dear Ms Pudiste,

This is to confirm that, based on the provided Commission Implementing Decision C(2025)8685 which in our understanding will provide financial support for the railway connection between Rail Baltica mainline, Riga Central and Riga Airport RIX stations, CINEA agrees in principle with the extension of the RIX northern viaduct substructure works included in CEF project 22-EU-TG-RBGP Part VIIIIG with an additional approximately 500 m towards Riga Central Station.

The adjustment of the scope of the related task T3.1.1. of the Grant Agreement shall be implemented in the context of a Grant Agreement amendment expected to be submitted by the coordinator in the first quarter of 2026, considering also other justified adjustments regarding other parts of this Grant Agreement.

The amendment request should contain all the technical and financial supporting information and explanation to allow for a positive decision concerning the above Grant Agreement scope adjustment.

Yours sincerely,

Morten JENSEN
Head of Unit
